Avocent® Integration Service

Maximize the value of your Aperture™ and Avocent Data Center Planner™ solutions with best-practice integration services

Infrastructure Management & Monitoring for *Business-Critical Continuity™*

The Avocent Integration Service rapidly integrates your Aperture and Data Center Planner solutions with third-party systems to help you optimize data center operations.

Key Benefits

- Tailor integration between systems to your exact needs
- Quickly complete complex integrations to automatically share information between systems
- Eliminate the need to maintain duplicate data in multiple systems
- Tie workflows across systems to streamline processes and eliminate manual data entry

Integration between the systems and tools you use to run your data center is the key to streamlining operations. But knowing how to quickly and successfully design and implement integration between so many different systems is a complex job that can eat up time and money.

The Avocent Integration Service will help you maximize the value of your investment in Aperture and Data Center Planner solutions within your data center. These services are tailored to your exact integration needs and can range from simple integration between asset management systems for sharing barcodes to complex, bi-directional data exchanges with third-party workflow systems.

Avocent Professional Services bring the experience you need to design and implement integrations between systems so that you can:

- Rapidly connect your data center. Avocent skilled consulting engineers are experts at integrating Aperture and Data Center Planner solutions with many different third-party systems.
- Eliminate data duplication. With the ability to exchange data in real time between your Aperture or Data Center Planner solutions and third-party systems, there is no need to duplicate data. Data remains in its native system, where it can be accessed and used in real time on an as-needed basis.
- Increase efficiency in the data center. Integrate Aperture and Data Center Planner workflow solutions with other workflow systems to fully automate data exchange and the execution of workflow processes.

Avocent® Integration Service

Maximize the value of your Aperture™ and Avocent Data Center Planner™ solutions with best-practice integration services

Infrastructure Management & Monitoring for *Business-Critical Continuity™*

Trust the Avocent Experts for Quick, Reliable Integration Services

The Avocent Integration Service is delivered by our experienced Professional Services team who are skilled at integrating Aperture and Data Center Planner solutions with third-party products, ensuring rapid, smooth and successful integration.

Using best practices, Avocent consulting engineers work closely with you to:

- Understand your specific integration requirements
- Create and validate a detailed integration plan
- Build and use a test environment
- Complete the integration within the production environment
- Validate and document the integration

Sample system integrations include:

- CMDB
- Workflow Management
- Network Management
- Application Management
- LDAP/Active Directory
- CFD Modeling Tools
- Temperature Monitoring
- Asset Management
- Work Ticket Management
- Cable Management
- Auto-Discovery Tools
- Financial and Billing Systems
- Business Intelligence
- BMS/EPMS

In addition to the Avocent Integration Service, Avocent Professional Services is ready to help you get the most from your IT infrastructure management investments with programs that can assist you through any phase of your IT lifecycle, from planning to implementation.

For more information and to order the Avocent Integration Service, please contact your local Avocent representative or visit us at **www. avocent.com/services.**
