ACU+ Controller
M820B, M821B, M820D, M821D, M820N

Key Features

- Flexible and scalable to satisfy your present and future needs with configurable IB (interface boards)
- Easily configurable file upload/download minimizes installation time
- Long battery life-span – sophisticated boost charge management
- Unattended battery test – advanced scheduled test/constant test/fast test
- High quality failure information – programmable logic controller provides intelligent alarm setup
- Lower operating cost – energy-saving standby function for rectifier

Designed for global use, the ACU+ Controller withstands high telecom standards, providing outstanding reliability and availability.

Description

The ACU+ is an advanced control unit designed for DC power applications. It can provide remote monitoring of the telecom site's AC mains supply, DC power plant, battery backup, diesel generator and site environment etc.

Featuring advanced battery management such as sophisticated boost charge control, remaining time and capacity prediction, constant current test, scheduled test and short test, and Battery Low Voltage Disconnection (BLVD), the ACU+ realizes easy and predictive battery maintenance. Furthermore, with basic energy saving and power split function, the ACU+ is a highly cost-efficient product.

The information and alarms from a specific site can be monitored or checked with a simple web browser or special monitoring software. When using a web browser, no additional software is needed, and the web browser login is password protected.
Technical Specifications

**General**
- **Power Supply**: 19 to 60VDC
- **Power Consumption**: 5W
- **Operating Temperature Range**: -40°C to +75°C / -40°F to +167°F
- **Relative Humidity**: 0 to 90%
- **EMC**: EN 300 386, 2001 class B, FCC part 15 class B
- **Safety**: IEC 60950-1, EN 60950-1, UL 60950-1
- **Approvals**: CE, UL and NEBS level 3

**Mechanical Data**
- **Dimensions (H x W x D)**:
  - M820B and M821B: 42 x 86.6 x 211.5mm / 1.65 x 3.41 x 8.33inch
  - M820D, M821D and M820N: 86.6 x 86.8 x 211.5mm / 3.41 x 3.42 x 8.33inch
- **Standard Installation Methods**: Hot pluggable in stand-alone or embedded power plants
- **Weight**: < 1 kg / 2.2 lbs

**Inputs/Outputs**

**Inputs**
- **Analog**
  - 2 battery currents, 1 load current, 1 bus voltage, 2 battery voltages, 3 temperatures, 3 AC voltages
  - 2 battery currents, 1 load current, 1 bus voltage, 2 battery voltages, 2 temperatures

**Digital**
- **Input for status of SPD auxiliary contacts, 10 load fuses, 4 battery fuses, bi-stable contactor status**: Refer to M820B
- **1 input for status of SPD auxiliary contacts**: Refer to M821B

**Outputs**
- **2 LVD mono & bistable contactors**: None
- **2 LVD mono & bistable contactors**: None

**Examples of Alarms**
- **DC Power Plant Alarms**: AC mains failure, Rectifier failure, DC/DC converter failure, High voltage shutdown, Fan failure, Thermal derating (of rectifier output due to high temperature)
