

66 Block Covers

Description

Plastic hinged covers (R66MHC__) are made for the R66 M series quick-clip terminal blocks, but may also be used on any quick-clip block with a 3.39-in. width (R66MOD, RJ21MOD, R700, or R66M connectorized series). They are available in 5-in. or 10-in. lengths. Color-coding identifies block function at a glance. The standard colors are orange and gray, but other colors are available upon request.

The cover attaches along the fanning strip, securely anchoring it to the block. The cover has a flexible hinge that won't wear out, tear or separate. It also features an erasable write-on surface for making pair identification simple and easy using either a pen or a pencil.

Clear plastic snap-on covers are made specifically for the R66B series (R66BC) and M series (R66MC) quick-connect terminal blocks. They are manufactured of self-extinguishing high-impact PVC, and easily snap-on and off the fanning strips without interfering with wiring.

Self-adhesive identification labels (L9556) can be ordered, which can be affixed to the cover to provide marking space for individual pair assignments.
