

Outside Plant for
Business-Critical Continuity™

NetReach™ BUP Series *Integrated Building Entrance Terminal Solution*

Key Features

- 25, 50 and 100 pair versions
- New compact 25 pair size requires minimum mounting space
- Outdoor or indoor mounting capability for greater flexibility
- Built-in splice chamber with removable cover provides improved wire management
- Sealed chamber offers superior environmental protection for protector modules
- Push to close slam-lock ensures a fast and consistent environmental seal
- Variety of input and output connections provides application flexibility
- Stackable up to to 300 pair with optional stacking kit
- All versions accept available cable skirt (ordered separately)
- Designed to meet GR-937-CORE
- UL Listed for documented performance

Description

The NetReach™ BUP Series is a self-contained building entrance terminal for indoor or outdoor applications. The enclosure is manufactured of heavy gauge mill-galvanized steel treated with a unique finishing process for longer life. Input connection options include field splice tail, 3M® 4005 dry and gel connectors, 710 dry and gel connectors or cable stub. Outgoing pair distribution options are RLS IDC or binding post screw down terminal blocks.

5-pin protector modules are housed in a sealed chamber-within-a-chamber for maximum environmental protection, which is especially important for outdoor applications. All UL listed standard 5-pin protector modules may be used with this line of enclosures.

The NetReach™ BUP Series is wall or pole-mountable. A new resealable stacking feature, which permits stacking up to 300 pairs, is standard on all units (stacking kit ordered separately). This removable seal replaces the traditional top exit knock out and is easily removed without damaging the cabinet. All units accept either a 28" or 52" cable skirt, providing protection to the feeder and distribution cable from incidental contact and the environment (cable skirts ordered separately). A quarter turn with a 216-type can wrench (Emerson catalog no. 15 or 38) is all that is required to open the unit. For further security, each unit is also equipped with a padlock hasp.

Application

NetReach™ BUP Series integrated building entrance terminal solution provides protection, termination, and distribution between the central office and the subscriber premises.

Potential application locations include multi-tenant dwelling complexes, hospitals, factories, shopping stripmalls, schools, and campus environments.

Dimensions

Pair Count	H	W	D
25	11.0-in. (27.9 cm)	15.4-in. (39.1 cm)	5.7-in. (14.5 cm)
50	15.8-in. (40.1 cm)	15.4-in. (39.1 cm)	5.7-in. (14.5 cm)
100	25.3-in. (64.3 cm)	15.4-in. (39.1 cm)	5.7-in. (14.5 cm)

BUPNGSTKIT	F1008446	Stacking kit for 25, 50 & 100-pair BUPNG*

* Each stacking kit joins two units only. If stacking three units, order two stacking kits.

Emerson (NYSE:EMR), based in St. Louis, Missouri (USA), is a global leader in bringing technology and engineering together to provide innovative solutions for customers in industrial, commercial, and consumer markets through its network power, process management, industrial automation, climate technologies, and appliance and tools businesses. For more information, visit: Emerson.com.

Emerson Network Power, a business of Emerson (NYSE:EMR), is the global leader in enabling *Business-Critical Continuity*™ from grid to chip for telecommunication networks, data centers, health care and industrial facilities. Emerson Network Power provides innovative solutions and expertise in areas including AC and DC power, precision cooling systems, embedded computing and power, integrated racks and enclosures, power switching and controls, infrastructure management, and connectivity. All solutions are supported globally by local Emerson Network Power service technicians. For more information on Emerson Network Power's full suite of solutions specifically supporting the communications network infrastructure, including NetSpan™, NetReach™ and NetXtend™ outside plant enclosures and equipment, NetSure® DC power systems, and NetPerform™ Optimization, Design & Deployment services, visit: EmersonNetworkPower.com/EnergySystems.
